Cheryl,
One final tweak in green and I'm done.

- In its review of the GenX Pre-manufacture Notice (PMN) submission, EPA determined that the chemical could be commercialized if the conditions of the consent order were met. Other replacements for older PFAS chemicals submitted as PMNs also went through review **Deliberative Process / Ex. 5**

Thanks,
Nancy

Also on Charlotte's questions:

I confirmed that the statement about PFAS being a concern for waterways came from OW.

The statements about the investigation have been included in our other public statements so I don't think we'd be making anything public here for the first time. OW, who has the lead for pulling together this document, is double checking that.

So something like this?

Deliberative Process / Ex. 5

Cheryl,
I like your new bullet- -this works and is what I was looking for. However the last sentence in that bullet is a bit unclear—maybe missing a word?

thanks

Thanks Charlotte. Checking on both of your questions.

Only other comment is on the following bullet:

- PFAs are an environmental and public health concern, especially in America's waterways and some drinking water, because of their wide-spread use, stability in the environment and possible health effects.

I am not aware of a large scale study sampling for PFASs in waterways ... did this statement come from OW?

Thanks!

Added a bullet on our PMN review of GenX as well as other chemicals that are submitted as PMNs. See attached. Let me know if this addresses your concerns. Thanks.
